

## Thank you for supporting NYCU!

We are delighted to see our outstanding students tell us about their backgrounds and stories. There are also spotlights and research highlights to show what NYCU has contributed to society. If you have time, please fill out the career development survey to let us better know your needs. And, feel free to download the April digital calendar to see our beautiful campus on your computer desktop.

## Snapshots

It is an honor to invite Phan Tan Tai from EECS IGP to share his story at NYCU. He demonstrates a strong interest in his study, and his success greatly inspires us.

"I have started my research journey at NYCU in 2019 with the passion of "How things are connected, how the mobile devices can communicate even from one side to another side of the world". I have been on this passion since owning the first smartphone, Samsung Galaxy S, in 2010. I was a high school student at that time. I am researching 5G Multi-Access Edge Computing (MEC), Mobile Network at Network, and Mobile System (NEMS) led by Professor Chi-Yu Li. Before that, I received a Master's degree in EECS IGP from NYCU in 2021. I also had published a conference paper at IEEE 8th World Forum on Internet of Things, 2021 during my Master's study. I worked at Pegatron Corporation in Taipei as a 5G MEC R&D engineer for almost one year before pursuing a Ph.D. degree at NYCU. During my work and study, I have many chances to work and study with diverse cultures from different countries. I am proud that I can share my story in Taiwan with you guys."

**Do you have an update to share?**  
Students and Alumni are all welcome. Click the button below!

## Spotlights

Some news in NYCU are shown as spotlights. We are pleased to tell you what has happened recently in the campus.

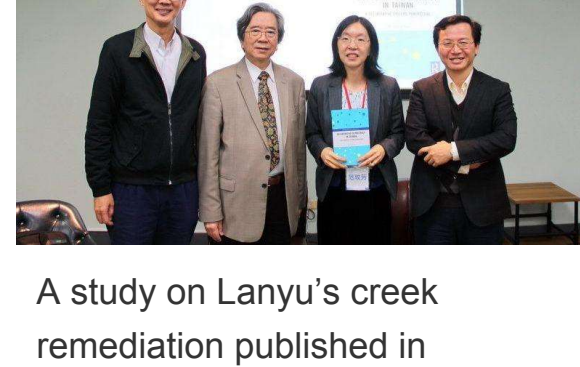

Team NYCU, the only Taiwanese delegation, will compete 2022 Maritime RobotX Challenge in Sydney, Australia. The goal of the competition is to complete tasks including passing through gates, obstacle avoidance, docking, underwater ring recovery, etc.

## Research Highlights

It is our pleasure to demonstrate the research achievement. NYCU provides valuable resources for the world.

The international collaborative study by the researchers in the Institute of Clinical Medicine at NYCU and the National Institute of Health (NIH) in the United States measured various common metals in human serum and found that six metals were related to the presence of gallstones and twelve metals were related to gallbladder cancer. Extremely high or low concentrations of metals may associate with cancer development.

## Career Development Survey

To help you have more fulfilling experiences in preparation for your career, we would like to invite you to fill out the survey to let us better understand your future career plan. This survey will take you 3 minutes to complete.

- If you are a **current student**, [please fill out this survey](#).
- If you are a **graduate**, [please fill out this survey](#).
- If you are an **alumnus**, [please fill out this survey](#).

Thank you so much for your time. If you have further questions about career development, please email [oiaintern@nycu.edu.tw](mailto:oiaintern@nycu.edu.tw)

If you have any other questions regarding general service, scholarship, or admission., etc. Please contact us at [oia@nycu.edu.tw](mailto:oia@nycu.edu.tw)

## April Desktop Calendar

Here is the digital calendar with the background of our beautiful campus. Feel free to download it for the computer desktop.

## Recruit NYCU students

Is your organization hiring? Find talented people at NYCU by sending an email to [oiaintern@nycu.edu.tw](mailto:oiaintern@nycu.edu.tw)

We can help you develop a recruiting strategy to meet your needs in effective ways through variable activities, such as hosting an information session. Let us know what you need!

## Giving to NYCU

NYCU works across disciplines to solve real-world problems. As one of Taiwan's top-tier universities, we are shouldering social responsibility.
