

Institutional Research Data Visualization

Institutional Research Data Visualization

CIRDA has a longstanding commitment to visualizing institutional research data. To better serve other departments and units within the campus, we have established and consistently maintain a data visualization platform, Tableau. We have granted access to specific themed dashboards for users with varying data permissions. The developed dashboards can be categorized into six main areas:

- Adaptive Admissions Support
- Graduate Career Path Survey
- World University Rankings
- Industrial Collaboration Projects and Funding
- Institutional Public Data Statistics
- Academic Performance Analysis
