

## 2024 Annual Smart Campus Achievements Exhibition

(1/4)

### 2024 "Digital Transformation & Smart Campus Exhibition" was successfully concluded

National Yang Ming Chiao Tung University (NYCU) is actively advancing digital transformation with the vision of building a high-quality smart campus. During the exhibition, the Vice President presented the university's digital vision and goals, structured around four core pillars: Teaching & Learning, Research & Innovation, Administration & Digital Literacy, and Infrastructure & Cybersecurity

In the area of Teaching & Learning, AR/VR technologies were introduced to create immersive, real-time translation environments, enhancing both interactivity and personalized learning experiences. Advanced analytics were also employed to monitor student performance in real time and improve learning outcomes. In Research & Innovation, emphasis was placed on industry-academic collaboration and interdisciplinary research. The effective integration of R&D resources fosters innovative solutions and cultivates a dynamic and creative campus culture..

Opening Remarks by Vice President Dr. Ta-Sung Lee on NYCU's Smart Campus Achievements

President's Remarks : Encouraging Smart Campus Advancement

NYCU is committed to building a smart campus through big data. The university has developed a personalized Learning Pathway Platform that spans three stages: talent selection (admission), learning assessment (during studies), and career development (post-graduation). This end-to-end system enables tailored support for each student, helping instructors adjust their teaching strategies accordingly.

Introducing the AI Course Intelligent Assistant

### AI Course Assistant Demonstration

Through dynamic video demonstrations and expert explanations, visitors experienced how AI technologies support teaching. For example, smart interactive systems provided real-time translation in language courses, and AR/VR applications boosted student motivation—clearly showcasing the innovative impact of educational technology.

Campus units continue to collaborate on the Smart Campus Project through innovative initiatives:

- **Campus AI Assistant Platform**  
Enhances administrative efficiency and communication via cross-functional collaboration.
- **Indoor Positioning Project**  
Builds a Wi-Fi/5G-based digital twin system to provide real-time, accurate indoor navigation for students and visitors.
- **Smart Campus Co-Creation Workshops**  
Promote bottom-up problem solving by engaging students and faculty in co-designing solutions—fostering a culture of innovation and participation.

This not only strengthens the school's problem-solving capability, but also effectively shapes the campus culture of diversity and innovation.

CIRDA is developing digital tools to improve administration and user experience:

**Visualized Institutional Data:**  
Simplifies access to data and enhances analysis through intuitive dashboards—boosting decision-making quality.

**Campus Assistant Tool:**  
Actively delivers targeted information to faculty, staff, and students for real-time communication.

**Augmented Reality Campus Tour:**  
Combines local and contextual AR applications to offer immersive campus tours, including 360° virtual visits for remote audiences—enhancing NYCU's image and visitor experience.
