

## Acknowledgement

There are thousands of theses born every year in summer time. Last year, I tried to create one of them in assistance and involvement under a lot of people. Now, I'm glad I could have one, although it is not absolutely perfect.

First thing, I would like to thank to my daddy. Without his support, I would not be here to write my acknowledgement. Next, I want to thank to my adviser, Dr. Lin, he is the hand there when I need. The suggestion from Dr. Chiang, Dr. Cheng, and Dr. Hsu is significant to my thesis, and I want to show my appreciation to them here.

Here, I want to thank all of you who ever join my two years journey at graduate school. Especially, Sandy, Qqair, Pppway, littlefeng, DirtyMing, Feng, and Mandy. I never know what I will meet next in my life, but you would be the best part I shall never forget.

Finally, I would like to thank all my friends and my family, you are the power make me move on, and I regret I cannot name you all. You know you are in my mind. Thanks to all the people who ever contributed to this publication, thank you!

*Annie Chen*

A Cloudy afternoon in Taoyuan city
